EXPERIENCE

Tumblr | Product Engineer
June 2016 - Present | New York, NY
- Getting everyone's memes and GIFs to their destinations as fast as possible by contributing to various features of the web app.
- Currently on the team that focuses on user themes and customization, using a PHP & Backbone-based JS framework.

delivery.com | Front-End Engineering Intern
September 2015 - December 2015 | New York, NY
- Interned on the Responsive team using an AngularJS framework in a sprint-based agile environment, heavily utilizing JIRA and Github.
- Contributed internal and user-facing tools and features by adding or modifying various Angular controllers, directives, and services.

Jawbone | Software Engineering Intern
June 2015 - August 2015 | San Francisco, CA
- Worked on the Web team; improved site e-commerce by adding new product data & assets using Python, JavaScript, and MySQL.
- Developed a feature to enable developers to create test users and simulate data to assist with the building of 3rd party applications.

Grooveshark | Android Developer Intern
June 2014 - August 2014 | Gainesville, FL
- Acted as a core member of the Android team and developed features for a major design overhaul of their Android application
- Worked in parallel with the web and iOS teams to design, implement, and integrate Chromecast functionality

PROJECTS

Project Cyborg | Live at: kennydurk.in/cyborg | Github: bit.ly/git-cyborg
- Hackathon project developed in 24 hours; undertaken to learn React JS.
- Produces Markov-chain generated tweets based off Twitter users

Stockswipe | Live at: kennydurk.in/stockswipe | Github: bit.ly/git-stockswipe
- Hackathon project developed in 24 hours; winner in Visual Design.
- Hand gesture recognition creating a physical UX on an elegant UI.

Giphetsy | Live at: kennydurk.in/giphetsy | Github: bit.ly/git-giphetsy
- Hackathon project developed in 24 hours; undertaken to learn Node.js.
- Generates random GIFs & routes to related Etsy products via API calls.

Personal Website | Live at: kennydurk.in | Github: bit.ly/git-website
- Long term portfolio project; undertaken to learn web development.
- Rebuilt using Python Flask with dynamic Jinja templating.
